*By Thomas Jordan, Peregrine Mobile Bottling*

Bottling day is more than just a finishing step - it's a defining moment. The wine you've nurtured through harvest, fermentation, and aging is finally ready to meet the world. At **Peregrine Mobile Bottling**, we don't just understand that moment - we respect it.

We know how much time, labor, and heart goes into making great wine. That's why we've built a mobile bottling service focused on **three core values**: *advanced technology, uncompromising cleanliness, and genuine care*. These aren't just buzzwords to us. They guide everything we do - from the moment we pull up to your winery to the last case we help you stack.

Let's take you behind the scenes of what makes Peregrine Mobile Bottling different - and why more wineries across Napa, Sonoma, Mendocino, and San Joaquin counties are choosing us as their trusted bottling partner. **Technology That Protects Your Craft**

Our bottling lines are designed with today's winemaker in mind: precise, efficient, and protective of your wine's integrity. Whether you're bottling a crisp white, a delicate rosé, or a bold red, we bring the tools to handle it with care.

### **What sets Peregrine apart?**

At Peregrine, we understand that great bottling is about more than just equipment - it's about **execution, coordination, and care**. Here's why wineries keep calling us back:

#### **Flawless Project Management**

Bottling day should feel smooth - not stressful. We treat each job like a carefully managed project. From pre-run consultations to precise scheduling and on-the-spot adjustments, our team keeps everything running efficiently. We don't just show up with a truck - we come prepared with a plan.

- Advance checklists, spec reviews, and site readiness support
- Clear communication with your team before, during, and after the run
- Flexible scheduling to fit your production needs

#### **A Professional Team You Can Trust**

Our technicians aren't just operators - they're trained professionals who take pride in their work. Many come from winery backgrounds themselves, which means they speak

your language (Wine, English and Spanish) and understand the nuances of wine handling and packaging.

- Sharp attention to detail
- Calm and competent under pressure
- Courteous and respectful to your crew and your facility

### **Steam-Sanitized Every Morning: Our Gold Standard in Cleanliness**

Cleanliness isn't optional - it's foundational. Poor sanitation can compromise wine's integrity, and we take that risk **very seriously**.

That's why **every single morning**, before a single hose is connected or a bottle is loaded, our team performs a **full steam sanitizing cycle** on the entire bottling line. Why steam? Because it's one of the most effective, chemical-free ways to kill:

- **Spoilage yeasts** (like Brettanomyces)
- **Bacteria** (like Lactobacillus or Acetobacter)
- **Mold spores**
- And any other unseen microbes that could impact your product

Steam sanitizing ensures that **your wine enters a clean, sterile system** that won't contribute off-aromas, contamination, or flavor instability. We don't take shortcuts, and we don't make exceptions - because we wouldn't want those risks in our own wine, either.

## We Treat Your Wine Like It's Our Own

At Peregrine, we don't just show up and run machines. We show up ready to become part of your production team for the day. That means collaborating with your winemaker, cellar crew, and operations staff to make sure bottling goes smoothly, from first setup to final cleanup.

### Here's what you can expect from our team:

- **Pre-bottling planning:** We'll work with you ahead of time to confirm specs, troubleshoot any concerns, and finalize details.
- **Hands-on support during bottling:** We arrive early, communicate clearly, and stay alert throughout the process.
- **Post-bottling feedback:** We review every run to look for areas of improvement or equipment adjustments.

Every bottle represents your brand. Your story. Your craftsmanship. We know that because we've been in your shoes - and we take that responsibility seriously.

## People-First Service

Technology and cleanliness mean nothing without the right people behind them. Our crew isn't just technically trained - they're experienced in real-world winery production. That gives us an edge not only in how we operate but how we communicate.

We know what a tough harvest feels like. We know what it means to hit a bottling deadline right before a big release. And we know what it takes to bottle with excellence even when the pressure is on.

Our promise? **We show up with professionalism, positivity, and respect** - because we're not just a vendor. We're your partner. And we're in this together.

## What Our Customers Say

"Peregrine is the best in the business. I love their attention to detail and communication throughout the entire bottling planning and process. They have great customer service, flexibility regarding bottling dates, and the quality of their work. In addition, they offer gas-management unit to adjust CO2 levels and to significantly reduce DO.

I am an advocate for their services and have already recommended them to colleagues. You spend so much time tending to your vines and making the wine, so the last step should be as good as possible too to capture the quality.

Thanks again for providing great service and being on top of the game. Looking forward to more bottling projects this year and in the future!"

*Johannes Scheid - Winemaker, Schug Carneros Estate Winery*

"Peregrine is a fantastic bottling line that has a great attention to quality. It is set up for many variations of packaging and gives winemakers lots of options to get their wines safely and beautifully into bottle."

*Ryan Prichard - Director of Winemaking, Three Sticks Wines*

## Conclusion: Precision, Cleanliness, and Care. That's the Peregrine way

At **Peregrine Mobile Bottling**, we don't just bottle wine - we protect your craft. With top-tier sanitation, expert project management, and a professional team that treats your wine like their own, we deliver quality you can taste and service you can trust.

If you're ready for a smoother, cleaner, and more reliable bottling experience, let's talk.
